RENISHAW 
apply innovation™

Renishaw's policy for REACH (Regulation EC 1907/2006)

In accordance with Article 33(1) of Regulation (EC) No 1907/2006, in the event that an article supplied by Renishaw contains a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0,1 % weight by weight (w/w), Renishaw is required to provide its customers with sufficient information, available to Renishaw, to allow safe use of the article supplied. This information must, as a minimum, include the name of the substance.

The European Chemical Agency (ECHA) published an updated list of Substances of Very High Concern (SVHCs) on 17th of June 2023 taking the number of SVHCs to 235. Renishaw is continually working with its suppliers to identify the presence of SVHCs in articles and materials used in its products. In the event that Renishaw becomes aware of the presence of a substance meeting the criteria above, whether through its own evaluation and test processes or through notification by an upstream Actor in the supply chain, Renishaw will issue appropriate notifications via the Renishaw Product Environmental Compliance webpage <https://www.renishaw.com/reach> and/or suitable amendments to product literature. Renishaw's SCIP information will also be updated to reflect these changes.

Should you have any further questions relating to REACH, SCIP and the SVHC content of Renishaw's products, please contact productsafety@renishaw.com

Yours sincerely,

Ian Jennings
Group Product Safety Manager
